

Income Focus Portfolio

April 2026

Objective

To provide a higher level of income relative to the broader market at the potential expense of capital appreciation over the medium to long term.

Performance Comparator:	IA Mixed Investment 20-60% Shares
Launch Date:	30/06/2024
Expected Yield:	6.07%
Portfolio OCF:	0.74%
Initial Fee:	Nil
Management Fee:	0.10%
Lowes Risk Level:	2+

Strategy

To achieve a higher level of income, the portfolio will typically invest in equity income funds which employ covered call strategies to earn additional premium, along with strategic bond funds which have the flexibility to invest across the fixed income spectrum. It will also be invested in line with the parameters of the Investment Association Mixed Investment 20-60% Shares sector, so this portfolio will always have at least 20% of its assets invested in equity funds but never more than 60%. As most of the return generated by the underlying holdings is by way of income, there is likely to be little or no capital growth over the medium to long term.

Performance to 30 April 2026¹

Performance is calculated assuming all income is reinvested and is net of underlying fund charges but gross of Lowes' investment management charge, platform charges and any ongoing advice fees. Deduction of these will have the result of reducing the illustrated performance. Please refer to your investment adviser or investment administrator for details.

Important

The portfolio is managed on a discretionary basis therefore the investment manager may make changes to the investments held without notice. Investors are agreeing to the investment model as recommended by an Adviser and may not be investing into the specific assets included in this factsheet. The factsheet will be updated and made available as soon as is practicable following a change made by the investment manager. Past performance is not a guide to future performance. The value of investments and any income from them can fall as well as rise and are not guaranteed, so you may get back less than you invested. If you invest in currencies other than your own, fluctuations in currency value will mean that the value of your investment will move independently of the underlying asset.

Consideration should be given to whether it is felt that the outcome of any risk assessment is accurate and advice should be sought for factors such as investment objectives, the investment term, attitude to risk, capacity for investment loss and the level of inflation.
